Will it rain in Philadelphia tomorrow

I am using the `get_forecast` function to retrieve the weather forecast for Philadelphia, which will help determine if it will rain tomorrow.

```
get_forecast JSON
```

```
1 {
2   "location": "Philadelphia",
3   "days": 1
4 }
```

↩ **Output**

```
1 {
2   "location": "Philadelphia, Pennsylvania",
3   "days": [
4     {
5       "date": "2026-08-08",
6       "high_f": 90.5,
7       "low_f": 73.8,
8       "precipitation_chance_pct": 46,
9       "conditions": "Slight rain showers"
10    }
11  ]
12 }
```

It appears that there is a 46% chance of precipitation in Philadelphia tomorrow, with slight rain showers expected. This suggests that it may rain in Philadelphia tomorrow, but it is not a certainty.

what's the current weather in New York

To answer the user's question about the current weather in New York, we need to get the current weather conditions for that location

```
get_current_weather JSON
```

```
1 {
2   "location": "New York"
3 }
```

↩ **Output**

```
1 {
2   "location": "New York, New York",
3   "temperature_f": 80.6,
4   "feels_like_f": 85.2,
5   "humidity_pct": 75,
6   "wind_mph": 10.6,
7   "conditions": "Mainly clear"
8 }
```

The current weather in New York is mainly clear with a temperature of 80.6°F, although it feels like 85.2°F due to the humidity. The humidity level is 75% and there is a gentle wind of 10.6 mph. Overall, it appears to be a pleasant day in New York.

evenings. Additionally, be prepared for potential rain on Sunday.

I'm thinking of taking a trip to Japan on Monday. Tell me the weather for Monday, Tuesday and Wednesday

To determine the weather for the trip to Japan, we need to get the forecast for the location.

get_forecast JSON

```
1 {
2   "location": "Japan",
3   "days": 3
4 }
```

Output

```
1 {
2   "location": "Japan",
3   "days": [
4     {
5       "date": "2026-08-09",
6       "high_f": 90.5,
7       "low_f": 74.1,
8       "precipitation_chance_pct": 91,
9       "conditions": "Light drizzle"
10    },
11    {
12      "date": "2026-08-10",
13      "high_f": 86.8,
14      "low_f": 73.5,
15      "precipitation_chance_pct": 78,
16      "conditions": "Light drizzle"
17    },
18    {
19      "date": "2026-08-11",
20      "high_f": 81.7,
21      "low_f": 70.8,
22      "precipitation_chance_pct": 59,
23      "conditions": "Overcast"
24    }
25  ]
26 }
```

It appears that Japan will be experiencing wet weather on Monday, Tuesday, and Wednesday. On Monday, there is a 91% chance of precipitation with light drizzle expected. On Tuesday, the precipitation chance decreases slightly to 78%, but light drizzle is still expected. By Wednesday, the precipitation chance drops to 59%, with overcast conditions predicted. Make sure to pack accordingly, bringing an umbrella or rain gear to keep you dry during your trip.
